PROFESSIONAL SUMMARY

IT and Digitalization professional with over a decade of experience in software engineering, business applications, custom ERP development, e-commerce platforms, system integration, and IT infrastructure support. Combines hands-on development experience with business process automation, operational reporting, hosting management, and cross-functional project coordination. Experienced in delivering practical technology solutions for local and global clients across e-commerce, distribution, telecommunications, travel, and property management.

Local & Global Delivery

Technology solutions delivered for employers and clients in Bangladesh, the US, and Europe across e-commerce, distribution, telecom, and travel.

Server & Infrastructure

Server administration, DNS, email hosting, backups, access control, and hosting cost management.

Enterprise Systems & ERP

Design, development, and support of custom ERP, POS, e-commerce, and supply chain management systems.

Security Operations

Firewall configuration, Cloudflare-based Layer 7 DDoS mitigation, access controls, and automated backups.

TECHNICAL EXPERIENCE

1. Enterprise Applications & ERP Applications

ERP & Operations: ERP applications, POS systems, end-to-end inventory management, purchasing workflows, supply chain, tracking, order fulfillment, multi-tier distributor/customer management.

Commercial Architecture: Billing, invoicing, digital payments, booking systems, property/asset management workflows, manufacturing/distribution data systems.

Platforms & E-Commerce: Shopify, WooCommerce, Wix, WordPress REST API, customized web-portal architecture.

2. Software Engineering, Integration & Automation

Backend & APIs: PHP, Laravel, Node.js, Python, TypeScript, JavaScript, RESTful APIs, third-party web services, enterprise system integration.

Frontend Technologies: React, Vue.js, Angular, Inertia.js, TypeScript, responsive UI frameworks (Bootstrap, Tailwind CSS).

Workflow Automation: Process automation tools, custom middleware development, agile project execution.

Agile & AI Acceleration: Utilizing AI-assisted tools (Cursor, Claude) for rapid MVP delivery, prototyping, and code reviews.

3. Data, BI & Analytics

Business Intelligence: Power BI, operational dashboards, custom SQL reporting for executive decision-making.

Tracking & Performance: Google Analytics 4 (GA4), data tracking pipelines, conversion metrics, performance analytics.

Database Management: MySQL, PostgreSQL, advanced query optimization, data modeling, Redis caching.

4. IT Infrastructure, Cloud & Cybersecurity

Cloud Architecture: AWS (EC2, RDS, SES, IAM), DigitalOcean, Vultr, Contabo VPS, scalable server configurations.

Core Infrastructure: Linux server administration, DNS management, corporate email hosting, SSL/TLS protocols, firewall configuration, routing.

Security & Continuity: Automated backups and data recovery, access control management (MFA, RBAC), firewall configuration, production support.

5. Leadership & Delivery

Team & Delivery Coordination: Experienced in managing frontend, backend, and QA teams, aligning technical execution with business requirements, and managing project priorities across development and delivery stages. Skilled in collaborating with business stakeholders, facilitating cross-functional communication, and resolving technical dependencies.

Vendor & Technology Manage: Experienced in managing with technology vendors and service providers for server, cloud infrastructure, and technical services. Skilled in evaluating technology solutions, assessing infrastructure requirements, troubleshooting vendor-related issues, and balancing cost, performance, reliability, and business needs.

PROFESSIONAL EXPERIENCE

Tech Lead — Business Applications & Automation

Feb 2025 – Present | Dhaka, Bangladesh

DESTINIQUE TRAVEL LLC

Florida, USA–based boutique, curated travel and luxury property rental company.

- Develop and maintain web applications, REST API integrations, and business automation solutions for travel inquiries, property quotations, visitor tracking, and operational workflows.
- Built custom tools for ad generation, promotion management, and monitoring, reducing repetitive marketing tasks and improving workflow efficiency.
- Automated property-description generation for quotation workflows, reducing manual writing and supporting the quotation team.
- Develop frontend features, backend integrations, and API-driven functionality while supporting deployment, troubleshooting, and continuous improvement.
- Monitor hosting costs and evaluate infrastructure options to balance performance, reliability, and operating expenses.
- **Key Projects:** Destinique Platform, Quote Application, Ad Generation Tool, Promotion Management Tool, Monitoring Tool, and Core Backend API Services.

Technologies: Angular, PHP, Laravel, MySQL, JavaScript, REST APIs, Bootstrap, Tailwind CSS, Cloudflare, Contabo VPS.

Technical Manager — JS Enterprise

Jan 2023 – Jan 2025 | Dhaka, Bangladesh

JS GROUP

Major FMCG importer & distributor with nationwide coverage, modern-trade outlets, and e-commerce operations.

- Independently designed and developed JS ERP, replacing the previous reliance on Tally for key business operations and centralizing sales, purchasing, inventory, supplier and customer management, invoicing, and billing.
- Automated key business processes through ERP workflows, improving operational coordination and visibility across commercial functions.
- Developed sales-force and distribution workflows to track distributor sales and monitor sales-officer performance, supporting field operations and management reporting.
- Managed the ERP development lifecycle, including requirements gathering, business-process mapping, database design, development, deployment, user support, and system stabilization.
- Coordinated with sales, warehouse, accounts, and technical stakeholders to translate business requirements into practical systems and streamline workflows.
- Managed the development and maintenance of ERP, POS, order-fulfillment, and internal business applications supporting retail, wholesale, inventory, and commercial operations.

Deputy Manager — PaiMart

Jan 2021 – Jan 2023 | Dhaka, Bangladesh

JS GROUP

- Supported the development and operation of PaiMart's e-commerce platform, serving more than 200,000 users, including application functionality, integrations, and ongoing technical improvements.
- Contributed to platform reliability, website traffic management, and security, including Cloudflare configuration to help mitigate Layer 7 application-layer attacks.
- Managed server billing and evaluated hosting options, including Vultr and AWS, to balance infrastructure costs, performance, and reliability.
- Collaborated with business and technical stakeholders to support e-commerce operations, order fulfillment, inventory workflows, and related business applications.
- **Key Projects:** JS ERP, PaiPOS, PaiMart E-commerce (200k+ users), Operations Fulfilment System, PaiBridge Multivendor Platform, Paisoftdiaper.com.

Technologies: PHP, Laravel, MySQL, JavaScript, REST APIs, Git, Cloudflare, Linux/VPS Hosting, AWS, DigitalOcean, Vultr.

Assistant Manager — Engineering
Oct 2019 – Jan 2021 | Dhaka, Bangladesh

ADN TELECOM PLC

ADN Telecom PLC is an ISO-certified, Bangladeshi public limited company recognized as a top provider of data, connectivity, and enterprise ICT solutions.

- Coordinated corporate technology deployments from requirements gathering and system integration to vendor coordination and ongoing technical support.
- Collaborated with cross-functional teams to analyze client requirements and deliver production-ready applications and digital services.
- Contributed to technology products and services including RoboKet, ADN SMS, ADN Email, and ADN Server, with involvement in server configuration and support.
- Delivered digital workflow and service-management solutions for clients, including the Non-Government Teachers and Employees Welfare Trust (NGTE Welfare Trust), a Bangladesh government ICT initiative.
- Supported client projects for organizations including Nitol Niloy (NTRAC), Goods in Motion (GIM), Nadia Furniture, Esquire Electronics, and FHDL.

Technologies: PHP, Laravel, MySQL, JavaScript, VPS Hosting, DNS, Firewall Configuration.

Software Engineer
Dec 2017 – Sep 2019 | Dhaka, Bangladesh

NYBSYS INC.

USA-based MNC technology and digital infrastructure provider operating across South Africa & Eswatini.

- Developed web applications, responsive interfaces, and API integrations for business and public-service solutions.
- Collaborated with distributed teams on projects involving web, mobile, IoT, LTE, and telecommunications-related solutions.
- Translated UI/UX designs and business requirements into functional, production-ready web applications.
- Worked with backend and engineering teams to integrate APIs and support end-to-end product functionality.
- Contributed to CDAS (Central Deductions Administration System for government payroll deductions in Eswatini), SLAS (Student Loan Application System portal), and the Drinkwell web platform.

Technologies: PHP, Laravel, JavaScript, HTML5, CSS3, REST APIs, Bootstrap, Git.

Web Developer & Server Administrator
Dec 2014 – Nov 2017 | Dhaka, Bangladesh

DHAKA WEB HOST LTD.

Bangladesh-based top web hosting, domain, and server solutions provider.

- Contributed to building and developing the web development team, supporting project delivery, client requirements, and the growth of the company's web development services.
- Developed and maintained client websites and web applications while providing technical support for Linux hosting environments.
- Administered hosting services, server configurations, DNS, SSL/TLS, corporate email, firewalls, and troubleshooting to support reliable website operations.
- Combined web development and server administration responsibilities to deliver end-to-end solutions for client websites and hosting services.
- Supported projects and services for clients including US-Bangla Airlines, Aftab Group, Bangla Academy, and Dhaka Life Insurance.

Technologies: Web Development, Linux, DNS, SSL/TLS, Corporate Email, Firewall Configuration, WHMCS, cPanel, Hosting Administration.

GLOBAL PROJECT ENGAGEMENTS

Head of Technology
Consultancy | Aug 2023 – Dec 2025 | Jamaica, New York, USA

BUZFI LLC

Jamaica, New York, USA–based startup digital marketplace connecting buyers and sellers.

- Contributed to the Next.js frontend, Laravel APIs, platform integrations, and deployment infrastructure.
- Supported hosting, performance, security, and ongoing platform improvements across Vercel, Cloudflare, and VPS environments.

Technologies: Next.js, Laravel, REST APIs, Cloudflare, Vercel, VPS.

Head of Development
Consultancy | 2020 – 2023 | Belgium

MOTMANS DIGITAL VISION

Belgium-based IT consultancy specializing in business applications and automation.

- Delivered 50+ web projects spanning websites, business applications, and digital solutions.
- Coordinated development teams, client requirements, technical implementation, and project delivery.

Technical Project Manager
Consultancy | 2022 – 2023 | Spain

STCK.PRO

- Coordinated iOS and Android application releases and cross-functional frontend, backend, and QA activities.
- Managed delivery priorities and technical dependencies for a stock-market news platform targeting US and European audiences.

Digital Business & Technology Consultant
Consultancy | June 2023 – Dec 2025 | Dhaka

SPIRETEC LIMITED

- Supported the launch of more than 10 business entities by coordinating brand identity, website development, mobile app initiatives, and digital marketing activities.
- Coordinated design, development, SEO, and promotional activities to establish the business's digital presence and support market entry.

GOVERNMENT INITIATIVES & TRAINING

Trainer and Facilitator — ICT Division (Learning & Earning Project)
Dec 2016 – Apr 2017 | Dhaka, Bangladesh

Government initiative focused on ICT skills development and capacity building.

- Trained over 200 students in HTML, CSS, PHP, WordPress, and MySQL through practical lab sessions.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science & Engineering
2010 – 2014

Dhaka International University (DIU)

TRAINING & PROFESSIONAL CERTIFICATIONS

Web Application Development with PHP

BASIS (Bangladesh Association of Software & Information Services) — 2015

Web Design & Development

Daffodil Institute of Information Technology (DIIT) — 2012
